## MOMO Start racing seats combined with the MOMO six-point harness system ensures the driver and passenger are kept safe in almost any possible scenario

If you're a motorsport fan and you're visiting Las Vegas, but need a short break from the usual activities in this city, there's a great solution: **SPEEDVEGAS**. Located just 10 minutes from the famous "Welcome to Las Vegas" sign, this a racing facility offers you a chance to drive some of the world's most popular muscle and sports cars, alongside some exotic cars, all on a purpose-built race track designed to offer one thing: an unforgettable place to experience the thrill of driving an exotic supercar on a real racetrack. Built by award-winning track engineers, the track is packed with high-speed straights, gut-wrenching sweeps, and tight, stamp-on-the-brakes deceleration zones.

Well, that's the road racing track they've got there. For our visitors that are more inclined to some dirt track racing, there's also a purpose-built dirt track in the middle of a racing course. A perfect way for any offroad fan to decompress from all the travel and queuing stress you got accumulated in your body and mind, that's for sure.

Visitors can purchase laps in a Baja Truck, a Trophy Truck, or if you're more inclined to some direct feel of those hills and jumps, a high-performance quad. For SPEEDVEGAS, the choice of a Polaris RZR proved to be a great one, as this nimble little offroader provides bushels of fun, all in the open-top driving experience. Naturally, safety is of the primary concern at SPEEDVEGAS and in turn, a set of **MOMO Start racing seats** combined with the **MOMO six-point harness system** ensures the driver and passenger are kept safe in almost any possible scenario. Both of these items are available for purchase from our [online store](#).

You can grab a more detailed look at the Polaris RZR and the SPEEDVEGAS dirt track right below.
